PLATINUM ELITE CLASS

PLATINUM CLASS

EXPERIENCE THE ULTIMATE

LUXURY REDEFINED

Luxury can be something of a subjective thing. What seems luxurious to one person may seem substandard at best to another. But there is a level of luxury that's so refined, so beautiful, and so impressive that it's unmistakable. The Platinum/Elite line of spas from Artesian are the embodiment of that level of luxury. Every aspect of these spas is designed to provide the user with the ultimate therapeutic spa experience. Simply stated, no other spa in the market can measure up to the quality, features, and beauty of a Platinum/Elite spa from Artesian.

SERENITY REDEFINED

There are few sounds more universally soothing than that of running water. It speaks to the most elemental part of ourselves. It soothes us, calms us, and restores us. With that truth in mind, we designed each Platinum/Elite spa with multiple AquaSerene™ water features which surround users with the soothing sights and sounds of gently falling water. Two pop-up fountains are infused with LED light and powered by the 24-hour circulation pump to provide a constant source of visual and auditory tranquility. Each Platinum/Elite spa also includes at least one Pillowfall water feature – also enhanced by LED lighting – which allow users to experience a calming cascade of water over neck and shoulders.

A close-up photograph of the interior of a hot tub, showing several circular jets of varying sizes and designs. The jets are set into a white, textured acrylic surface. The lighting is soft, highlighting the metallic and plastic components.

COMFORT REDEFINED

When designing our spas we don't use the latest 3D modeling software – in fact, we don't even use a mouse. We use such blunt instruments as chisels, sand blocks, files and putty knives. Indeed, we take pride in just how primitive our design process is. We create our molds the old fashioned way – we sculpt them by hand. The creation of the beautiful, organic forms that grace our spas is far more art than science, and the intimate human contact with our process ensures that our great looks are built for the human form.

A photograph showing water jets in motion within a hot tub. The water is splashing and creating a dynamic, textured surface. The jets are circular and appear to be made of a polished metal. The background is a soft, out-of-focus white.

PERFORMANCE REDEFINED

Artesian's Platinum/Elite spas are indeed beautiful. But our spas are far more than just aesthetically pleasing. Behind the graceful lines and pampering surfaces lies the most powerful, sophisticated system ever devised for moving and controlling the flow of water in a spa. This personalised water control system is what truly sets this Artesian spa line apart. The Platinum/Elite spa moves more water volume through jets – with much greater power and less resistance than any other spa in the industry. Simply stated, you will not find a better performing, more therapeutic spa anywhere.

PLATINUM CLASS

CYPRESS POINT

2.35m x 2.35m x 0.95m

specifications

seating capacity	6 / 7
dry weight	355 Kg
filled weight	2265 Kg

light	DynaStar™ LED
filter type	(2) 50 sq ft pleated (1) disposable Micron

jets

52

Cypress Point is an open-seat, high performance therapeutic spa. Loaded with a mix of 52 powerful jets, including patented Helix jets and AccuCyclone jets, foot jets for every seating position and two DirectFlow controls, this premium spa offers everything for the ultimate home spa experience.

This feature-packed Platinum spa shares similar dimensions and assets with the Cypress Point. However, the Pacific Dunes has a dedicated lounger, along with dual rotating foot jets and calf massage jets, which makes this a unique spa. With 52 high-performance jets, a jetted cool-down seat, lounge leg massage and jetted footwell you need to look no further than the Pacific Dunes for a large luxury lounging spa.

This midsize spa is ergonomically designed to keep you in place as the array of jets work their wonder. The Shadow Mountain offers a dedicated lounger and a dynamic, super-massage foot and leg well in the lounging position. This spa is a space saver that will fit through most exterior doors, yet it easily gives you all the luxury and comfort that are characteristic of a Platinum Spa from Artesian.

This seven-foot spa is a smaller version of the eight-foot Cypress Point. The Bear Creek is tailor-made for the discriminating buyer who wants the best spa on the market, but who has space restrictions. This spa showcases the same features found in the Cypress Point, with only 10 fewer jets than its big brother.

The elegant River Ridge is an innovative luxury spa that makes a bold statement. It is the largest three-person spa available in the market, and its unique seating offers an unparalleled hydrotherapy experience. This high-performance spa is one-of-a-kind.

The Energy Saving Variable Flow Control

The innovative variable flow control system (VFC) is designed to work with our exclusive patented DirectFlow™ water delivery system. It allows the spa user to control the level of massage pressure (water output) by conveniently adjusting the spa-side control. The control consoles also allow the user to operate and adjust the pumps from the seating positions in the spa. The VFC replaces diverter valves used in the traditionally built spas. Unlike the diverter valve, the VFC does not rob water from one massage area to give more pressure to another area. Instead, the VFC gives the user the ability to soften or increase the water flow in the desired section of the spa, offering remarkable massage control while retaining maximum potential performance.

“with the VFC turned to low the Pumps are using 50% less electricity than a traditional Spa with diverters”

dynastar™ and dynabrite™ lighting systems

Every Platinum/Elite spa comes standard with the DynaStar™ L.E.D. lighting system, which consists of a large main light as well as lights in the pillows, pillowfalls and AquaSerene water features. The optional DynaBrite L.E.D. lighting system* adds an additional 7 underwater lights, as well as 2 exterior accent lights on the outside corners of the spa. This unique light show utilizes multiple two-inch lens fixtures that house synchronised light generators. This ten-function system leaps to life with a touch of the button on the spa control pad. Each touch washes the water with up to five different coloured lights and allows the user the ability to stop on any one of the preferred colours. But the family of solid colours is not where the DynaBrite light show earns its name. Scroll further with the control button, and you will discover a multicolored adventure with each touch. The final five functions are different combinations of colours set side-by-side in an artful transition. The DynaBrite™ L.E.D. Lighting System is your invitation to a truly dazzling spa experience.

*DynaBrite™ L.E.D. lighting system is optional on all Platinum/Elite spas

artesian smartpad control console

This user-friendly keypad provides a maximised viewing area with an adjustable backlight. It features highly responsive keys that provide a confirmation when the keys are pressed. Its menu-driven interface features use of visible icons, making control of the spa simple for the spa user.

PELICAN BAY

The all new Pelican Bay offers the most space a Platinum Elite spa has ever offered. This spa features an astonishing 69 high-performance, sophisticated jets and five therapy pumps, as well as a WhisperPure circulation system with a high flow pump. The Pelican Bay Platinum Elite spa does not sacrifice therapy or performance for the sake of size.

It's no wonder the Piper Glen was awarded the Consumers Digest "Best Buy" Award in the Premium Category of spas. Loaded with 67 high-volume, sophisticated massage jets and four full-therapy seats, the Piper Glen certainly offers the ultimate spa experience.

QUAIL RIDGE

DIRECTFLOW[®]

why divert when you can direct?

The innovative patented DIRECTFLOW[®] switchless motor and plumbing system of the Platinum Elite line makes use of highly efficient, long-lasting pumps and motors, located approximately under each hydrotherapy seat or positioned relative to a special feature such as the foot massage dome. Each seat is controlled by a DIRECTFLOW[®] personal control panel consisting of an on/off switch, as well as an air control for the jets and a Variable Flow Control[™] (VFC) located in easy reach of the spa user. VFC is an integral part of the DIRECTFLOW[®] system. This patented valve gives users the ultimate in personalised control over the spa hydrotherapy environment.

DIRECTFLOW[®] FEATURES AND BENEFITS

- **ONE PUMP PER SEAT:** This allows for optimised efficiency and control by supplying exactly the desired amount of water to only the seats that are occupied, instead of turning on the whole spa.
- **ONE CONTROL PER SEAT:** Each spa occupant has their own DIRECTFLOW[®] Personal Control panel. This allows for personalised, ergonomically efficient control without having to move around the spa.
- **DIRECT WATER FLOW:** Water flows directly from the pumps to the jets with no diverters, valves or dead ends. This system provides maximum output with a minimum of resistance.
- **EFFICIENCY:** The DIRECTFLOW[®] system allows the use of smaller, more efficient pumps. This, combined with the fact that each seat has its own pump and control, eliminating the need for diverters, means our spas operate with maximum efficiency and durability, greatly reducing the long-term cost of operation.
- **VARIABLE FLOW CONTROL[™]:** The VFC valve allows the user to regulate the water output from the pump by adding air into the line before the pump (decreasing output) and after the pump (increasing velocity), giving each user maximum massage control from their seating station. The VFC valve also eliminates traditional diverter valves, simplifying the plumbing of the spa and increasing durability while greatly reducing noise and energy costs.

The Platinum/Elite Spa Clean Water Story

The Platinum/Elite Spa by Artesian is the highest performing, most efficient spa available today. This spa's innovative, frictionless micro-volt pump runs 24 hours a day, continuously filtering the water. It moves up to 30 gallons of water a minute through a 2-micron disposable filter, providing ten times greater filtration than the commonly used 50-sq. foot cartridge filters. For mere pennies a day, your spa water is cleaned by the finest spa filter offered in the industry.

Artesian carries the clean water factor a step further. Our KleanWater Management System utilizes the Artesian Nature2 Mineral Stick coupled with an ozonator. This enables the Platinum Spa owner to maintain sanitized water automatically and with a major reduction in the use of harsh chemicals. Through controlled release, the Artesian Nature2 Stick maintains a base residual of bacteria-killing silver in the water. Having killed the bacteria, the silver clings to the dead bacteria and waits for a hyper-oxidizer to release it to kill again and again.

The hyper-oxidizer is ozone that is produced by an Ozonator. Ozone is an agent that supplements the killing capacity of silver and frees up the silver to kill additional bacteria as it occurs. Just as ozone is produced by lightning and is nature's way of helping to clean our atmosphere, an ozonator utilizes an electrical charge to produce ozone into the spa, naturally killing bacteria in the spa and allowing for reduced chemical use in the water.

The KleanWater Management System is simply the best offered in the home spa industry. Combining Artesian's magnetic 24-hour circulation pump, the exclusive 2-micron disposable filter, Nature2* technology, and ozone, the result is water so clean that it exceeds the EPA's standard for bottled drinking water.

NOTE: this water care system does not balance the acidity (PH) of the water, which must be regularly monitored to insure the effectiveness of this (or any) water care system. Use of dichlor may be required at start up or for intermittent aggressive treatments.

*Nature2 is an optional feature.

MADE TO THE HIGHEST STANDARDS

Looking for a spa can be a daunting experience.
You want to know you are getting value for your money.

STANDARD FEATURES

Switchless motor technology

The revolutionary switchless motors used in the Platinum/Elite spas drive high-water-volume pumps that are long-lasting and virtually trouble-free. The result is the most energy-efficient, cost-effective spa on the market today!

The switchless motor design does not require a mechanical switch to take it from the start position to run position, which greatly increases the efficiency of the motor. It also diminishes operating noise, such as the vibration and electrical noise heard with conventional motors. An added bonus of the switchless motor is this design requires from 10 to 16 fewer parts than a conventional motor, which means many potentially problematic components have been eliminated. The life of our switchless motors can be measured in tens of years instead of hundreds of hours.

A Green Spa?

All the performance in the world can be wasted if it's not efficient. The Platinum/Elite DirectFlow system, utilising our switchless pumps keeps your electric bills low. Because of their lower power requirements and the control of water flow, our pumps actually deliver more water with less resistance. This combined with our patented VFC's means a Platinum/Elite spa may cost 50 percent less to operate than a traditionally built spa. You should relax in your Platinum/Elite spa, knowing that luxury and high performance do not mean increased consumption and high cost.

WhisperPure™ circulation system

The amazing 30 gal at .4 amp super high-efficiency pump circulates all the water in the spa through our special Micron filter and through the high-yield ozonator and heater, up to 100 times per day. Our WhisperPure™ circulation system with Silent pump technology is so quiet you won't believe it's working as hard as it does.

AquaSerene™ and Pillowfall Water Features

Every Platinum/Elite spa comes standard with multiple, serenity-enhancing AquaSerene™ water features. Two pop-up fountains, powered by the 24-hour circulation pump, provide a constantly available source of visual and auditory tranquility.

Each Platinum/Elite spa also features a soothing waterfall with all its tranquil effects. Simply enjoy the serene sound of the falling water or nestle under and feel the warm water sweep down your neck and back. With our standard DynaStar™ lighting system, both the Pillowfall and fountains are infused with LED light.

STANDARD FEATURES...CONTINUED

Ozone: natural clarity is a beautiful thing

What does ozone do for your spa water? Ozone destroys bacteria, viruses, and mildew, and eliminates spores and fungus, as well as oils and other contaminants. It keeps your spa water clean, clear and fresh. Ozone ultimately enhances the performance of chlorine and bromine in your spa and allows you to use substantially smaller amounts of those chemicals to achieve and maintain sparkling, clean water. Every Platinum/Elite spa has an ozonator installed for 24 hours of treatment.

Platinum elite micron filter

The Platinum Elite disposable micron filter creates a unique filtration method for spas with circulation systems. Lower density fibers are used on the surface of the filter, with higher density fibers nearer the center. This increases the dirt-holding capacity of the filter cartridge, as well as greatly increasing the efficiency of the filter and the clarity of the water. This disposable filter design improves water circulation while reducing the use of chemicals in your spa, and it has proven to be much more efficient and effective than the standard pleated cartridge filter.

Full Foam Insulation

The space between the maintenance-free cabinet and the structure is filled with high-insulation foam. Full-foam insulation combined with our heavy-duty spa cover works to ensure the best rate of heat retention available in any spa. But that's not all! Full-foam insulation offers a host of other benefits, such as a stronger spa structure and less wear on plumbing welds by holding all jets and hoses securely in place. This dramatically increases the lifespan of the plumbing by virtually eliminating movement and vibration.

Durable Acrylic Shell

Every Artesian spa has a durable shell constructed of beautiful acrylic with our lifetime Diamondbond backing. Our jets rotate on bearings rather than plastic for ease of adjustment, and our pillows are a dyed-through, closed-cell foam to prevent cracking, discoloration, and water absorption.

Long-lasting PermaWood Cabinet

At Artesian, we ensure that you get the best possible value by producing the highest quality spas available today. Every Platinum Elite Spa comes standard with a long-lasting PermaWood cabinet and a full ABS bottom, as well as a bottom drain for easy water changing.

Dynastar Lighting

A sensory Multi colour LED light show consisting of the main spa light, pillows, pillowfalls and aquaserene water features.

OPTIONAL FEATURES

*stereo systems are optional

Our stereo features a floating remote control.

poly-planer[®] stereo system

Your search for the ultimate multi-sensory spa experience is over. Artesian's Platinum/Elite spas now offer the Poly-Planar[®] Stereo System*, the most innovative audio system available for the spa environment today. The Poly-Planar[®] receiver, MP3 player, and CD has been designed specifically for use in spas and is conveniently controlled by the durable floating remote control. You can surf the radio dial with AM and FM frequencies, or relax with your favorite CDs or MP3s. This system features two waterproof pop-up speakers which can be rotated a full 360°, as well as a serious subwoofer contained in the cabinet. The depth and quality of the sound produced by the Poly-Planar[®] system provides a technologically refined, high-quality audio experience that will enhance and compliment your spa enjoyment.

Patio Speakers

When you want music on the patio but are not using your spa! At the flick of a switch you have high quality sound from the 5" dual cone waterproof speakers on the spa cabinet. No need to lift the cover and waste heat!

Dynabrite Lighting

Upgrade to this truly amazing night time light show with an additional 7 light lenses.

ProGuard Cover

The ProGuard has a 150mm to 100mm tapered high-density Dura-Core foam insert with 18-gauge galvanized steel c-channel beams and is capable of withstanding 270kg across the cover surface.

Artesian Nature 2

This enables the Platinum/Elite spa user to maintain sanitized water automatically with a major reduction in the use of harsh chemicals. The Artesian Nature 2 maintains a base residual of bacteria killing silver in the water.

Propure Ozone

This higher output ozone generator combined with vortex mixing chambers gives crystal clear water and requires even less chemicals than standard ozone.
